**RE: Recommendation**

To Whom It May Concern:

Dakem and Associates were contracted to build my medical office the summer of 2009. Dakem completed the work in a very timely manner and did everything possible to keep on schedule. Their attention to detail was exemplary and I was very pleased with the results. Changes during construction are inevitable, and there are things that I didn't consider in the earlier phases of development. There was never a request I made of Dakem that wasn't received in a "**CAN DO!**" attitude. From placing a floor drain under the washing machine to penetrating a sheer wall to utilize ten square feet of additional office space, Dakem was nothing short of amazing in their implementation.

The overall construction was very close to budget, and anything over budget was due to my requests in "adding things" to the overall construction plans. Dakem was also excellent in going back to the individual contractors and negotiating lower charges for add-ons to the project. This resulted in thousands of dollars of savings for me. I have no doubt that Dakem kept my construction costs to the absolute minimum. I have not a single reservation in highly recommending Dakem as you contractor.

One final note, I would like to personally thank Danny Amster. It is one thing to go through this process and be happy with the results. It is another level to go through this and end up with a friend. If you have any questions or wish to contact me feel free to call or Email me at [CSamlaska@aol.com](mailto:CSamlaska@aol.com).

Sincerely,

Curt P. Samlaska, MD, FAAD, FACP
